

If you are doing Video Verification through Mobile then download an App called Vsign CA from your App store. And proceed for video verification.

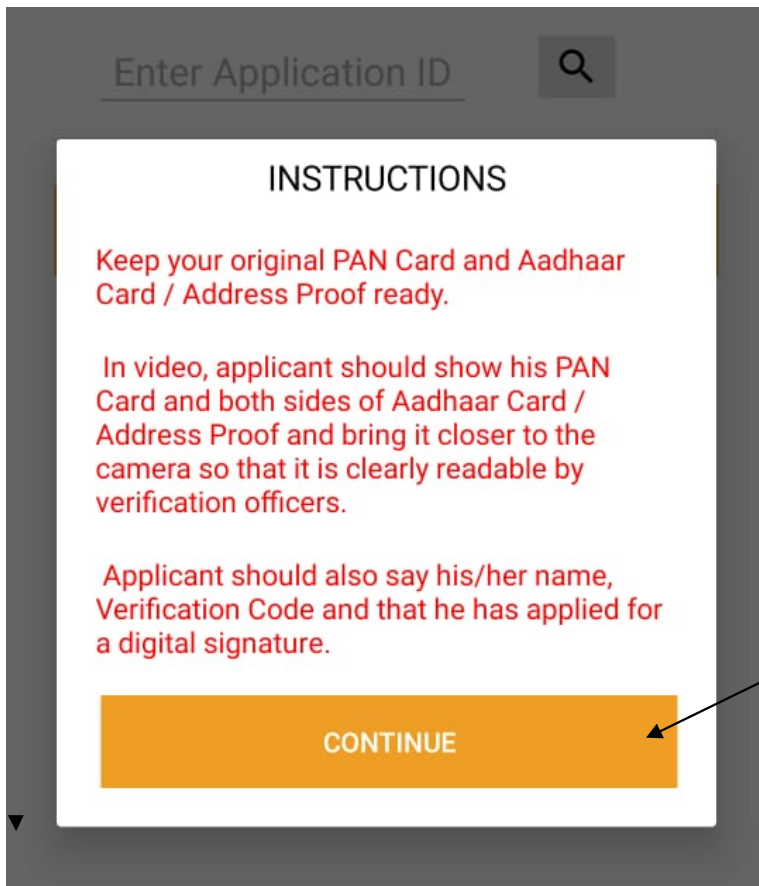

Please find the link below

<https://play.google.com/store/apps/details?id=videorecord.vsign>

After installing this software click on open and you will see the following

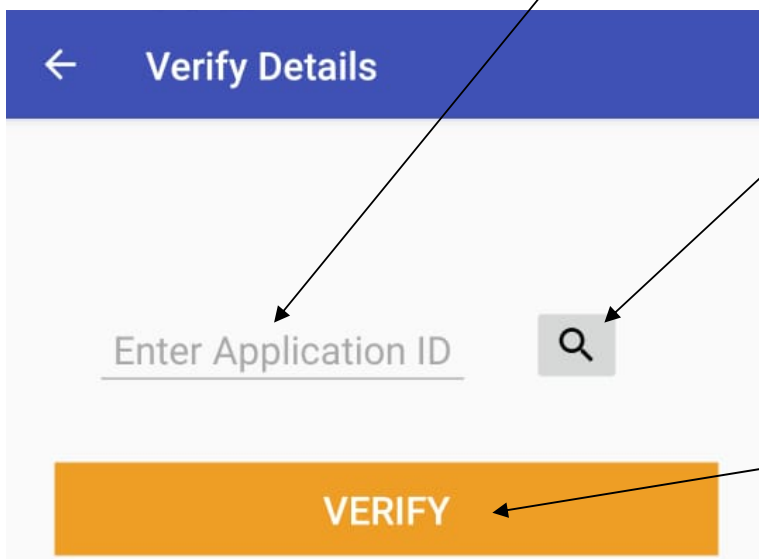

After Clicking on Video Verification You will see these instructions where in it is mention that you need to show your Original PAN & Aadhaar but if your Aadhaar is connected with Mobile then you need not show to these docs.

Click on

After Clicking on Continue You will see the following where in you are supposed to put in your Application id and click on search

After click on search you will have to put your date of birth and then click on Verify

After click on verify you will be able to see your face here. And now you need to read the following script

## Record Video

Your Face will show here

**Click the Record button and read the script below**

1. My name is
2. My video verification code is \*\*\*
3. I have applied for Vsign DSC.

Code will display once you click on Record

**Please show your PAN Card and Address Proof**

After recording you need to **View**  
And then **Submit**. While submitting it may ask for address proof no. wherein you will have to put last four digits of your Aadhaar.  
After reading the script make sure that video is continue till the end
